

**REMARKS**

Pursuant to 37 CFR § 1.821, Applicants submit herewith a Sequence Listing of SEQ ID NO:1 through SEQ ID NO:4. Applicants hereby assert that the content of the computer readable form ("CRF") of sequence listing does not constitute new matter, but is a listing of the sequences contained in the application, claims and figures, and the sequence incorporated by reference in the present application at page 8, line 11 through Ullrich, et al., in *Nature*, 1984, 309:418-425. The Specification and Claims have been amended to include references to the Sequence Listing.

It is further brought to the attention of the Examiner that these sequences were previously submitted in the Amendment filed on April 4, 1995, which amended the specification but did not provide a sequence listing. In that amendment, however, the sequence that corresponds to SEQ ID NO:3 contained inadvertent, typographical errors, which the applicants believe were introduced due to incorrect scanning. The Sequence Listing submitted herewith corrects those errors.

The Applicants have attempted to address all issues noted in the Notice. If there are any further questions, the Examiner is requested to contact the undersigned.

Respectfully submitted,

SHERIDAN ROSSP.C.
